

What is MyTable?

MyTable is an innovative concept of table. It breaks the boring static tables introducing a fun way to entertain the customers.

"Touch Your Fun" is our slogan which lock up the double meaning of MyTable: ordering your favorite food through an intuitive touchscreen environment and entertaining the customers while they are waiting.

The quality of MyTable is guarantee by the Italian trademark, which boats many years of glorious design and amazing fashion. MyTable has been designed for trend's restaurants, pubs and discos where the elegance meets the technology.

**Touch your Fun,
Touch MyTable.**

System Features:

- MyTable has a totally modular software. Each component like for example, the background, the icons, the games and the menus are totally customizable. The customization is an important process, for us, to build an unique ambient
- Each MyTable is available in different colors following the international color standardization.
- The table is available in different sizes and different formats as you like.
- We sell singular tables but also more convenient packages. Each package has X tables (where X depends on how many tables you want) Y Access Point (Y depends on your local's walls) and one server which coordinates all the X tables. The number of tables doesn't effect the number of servers. The tables might be different, and they can be upgraded during the years having an always new and trendy software. We also provide to an easy installation' s manual or you can buy a cheap installation package which include a software engineer directly on your place.
